+TECHNOLOGYFIRST

By VALOREMFIRST

If you want your business to flourish, you need to be able to focus on the things that are going to add the most value. The last thing you want to worry about is your existing technology causing problems or costing you money and if you want to invest in something new, you need confidence that it will be the right fit for your business.

Your business needs strong foundations to grow from. Having the right technology that works as expected, but also increases your resilience, is vital.

+TECHNOLOGYFIRST is a technology risk and resilience review that looks across your entire business. It gives a clear view of where the weak points are and identifies the critical areas of exposure that could result in your business grinding to a halt.

> **On average, UK businesses lose 31 hours every week due to technology interruptions and performance issues**

So how does +TECHNOLOGYFIRST work?

Our +TECHNOLOGYFIRST framework assesses all aspects of your technology set up. It gives you invaluable insight into where it could all go wrong and provides real advice to stop it from happening.

We will work in partnership to increase your internal technical capabilities and knowledge. Our approach gets under the skin of your technology to build resilient services and infrastructure, and proactively identify what's keeping you awake at night.

It thinks holistically about all the impacts that technology can have on your business and your customers. Our recommendations can help you stabilise and secure your technology which will make your business more resilient.

By stabilising and securing your technology, your business will be more resilient.

+TECHNOLOGYFIRST
By VALOREMFIRST

We will baseline your core infrastructure and associated processes against pre-defined Valorem First best practice controls and measures.

This includes:

+ Your critical infrastructure and core business applications
+ Understanding your business requirements for the technology that is in place
+ Speaking to your business to better understand how technology is used
+ Assessing how your current IT landscape is supported, secured and maintained
+ Ensuring you are getting the maximum value from existing investment in your technology
+ Highlighting opportunities to improve your technology setup

It increases your business resilience and technical composability.

What can you get with +TECHNOLOGYFIRST?

The detailed +TECHNOLOGYFIRST report will show you where your technology weak points are but it will also advise on how to make your environment stable and secure.

It will provide you with the tools to increase your technology composability and proactively minimise the critical areas of exposure you already have.

But most importantly, it will give you access to our experts who can work with you to increase your knowledge, keep you safe, and stop you worrying about your technology costing you time and money.

This provides a strong foundation, which underpins the future development of your technology strategy, roadmap and support required. It will enable you to define the next stage of your technology journey and the ongoing support we can offer you to make it happen.
